Click at the plus button, then click select.

The screenshot shows the ParseHub browser interface. On the left, the 'Commands' panel is open, displaying a list of commands under the 'main_template' category. A red arrow points to the 'Select' command, which is highlighted. A tooltip explains that 'Select' targets one or more elements for a command (auto-extracts data if possible). Below the 'Select' command, there are options for 'Relative Select', 'Click', and an 'Advanced' dropdown. The main content area shows a web page from kaskus.co.id with a forum post. The bottom of the interface features a 'Got Data' button and a section for data preview, which currently displays 'A preview of your data will appear here'. The bottom navigation bar includes links for 'API', 'Tutorials', and 'Contact'.

Click the first username, the color will be changed to green.
Scroll down and click at the other username.

The screenshot displays a web browser window with the address bar showing the URL `https://www.kaskus.co.id/thread/5a95567b162ec2970e8b4567`. The browser's developer tools are open on the left, showing the 'main_template' and 'Options' tabs. The forum page itself has a blue header with navigation links like 'STORY', 'HOBBY', 'GAMES', etc. A red arrow points to the first username 'galaxys' in the thread content. The thread title is '[Waiting Lounge] Samsung Galaxy S9 | S9+ The Camera. Reimagined'. The main content of the thread says 'Welcome To Samsung Galaxy S9 / S9+ Lounge' followed by a warning triangle icon. The right sidebar features a 'Top Threads' section with various links. At the bottom of the browser window, there is a 'Get Data' button and a status bar with 'selection1' and 'selection1_url'.

Change the commands name to “Page1”

The screenshot shows the ParseHub application interface. On the left, the 'Commands' panel is visible, showing a list of commands under the 'main_template' section. A red arrow points to the 'Select Page1' command, which has a '(20)' next to it. Below it are 'Extract name' and 'Extract url' commands. The 'Selection Node' section shows 'All elements with class nickname' and a 'Wait up to 60 seconds for elements to appear' option. A 'Get Data' button is at the bottom of the left panel. The main area displays a web browser with a Kaskus thread. The thread title is 'Ikutan nunggu gan' and the content is about a Samsung S9+ cashback. The thread is posted by 'kotaknih' and has 885 posts. The thread is dated 27-02-2018 21:33. The thread content includes a quote from 'Raiserszz' and a quote from 'uchica'. The thread is also quoted by 'Moderator (6)'. The bottom of the interface shows a JSON output for the 'Page1' command, which contains two objects with 'name' and 'url' fields.

To relate username to the user comment, click username and place the arrow to the comment area.

The screenshot displays the ParseHub web scraper interface. On the left sidebar, under 'Commands', the 'main_template' is selected, showing options like 'Select page', 'Select Page1', 'Extract name', 'Extract url', and 'Relative selection1'. The 'Selection Mode' is set to 'All elements'. A 'Get Data' button is visible at the bottom of the sidebar.

The main content area shows a forum thread from Kaskus.co.id. A red arrow points from the username 'galaxys9' in the post header to the comment area. The post content includes a title 'JANGAN POST DULU SAMPAI POST KE 10 YA GAN' and a body of text.

At the bottom, there are buttons for 'CSV/Excel', 'JSON', and 'CSV/Excel Wide (beta)'. Below these, a JSON output is shown, including fields like 'name', 'url', and 'selection1'. A 'Get Data' button is also present at the bottom right.

Change the name to “comment”

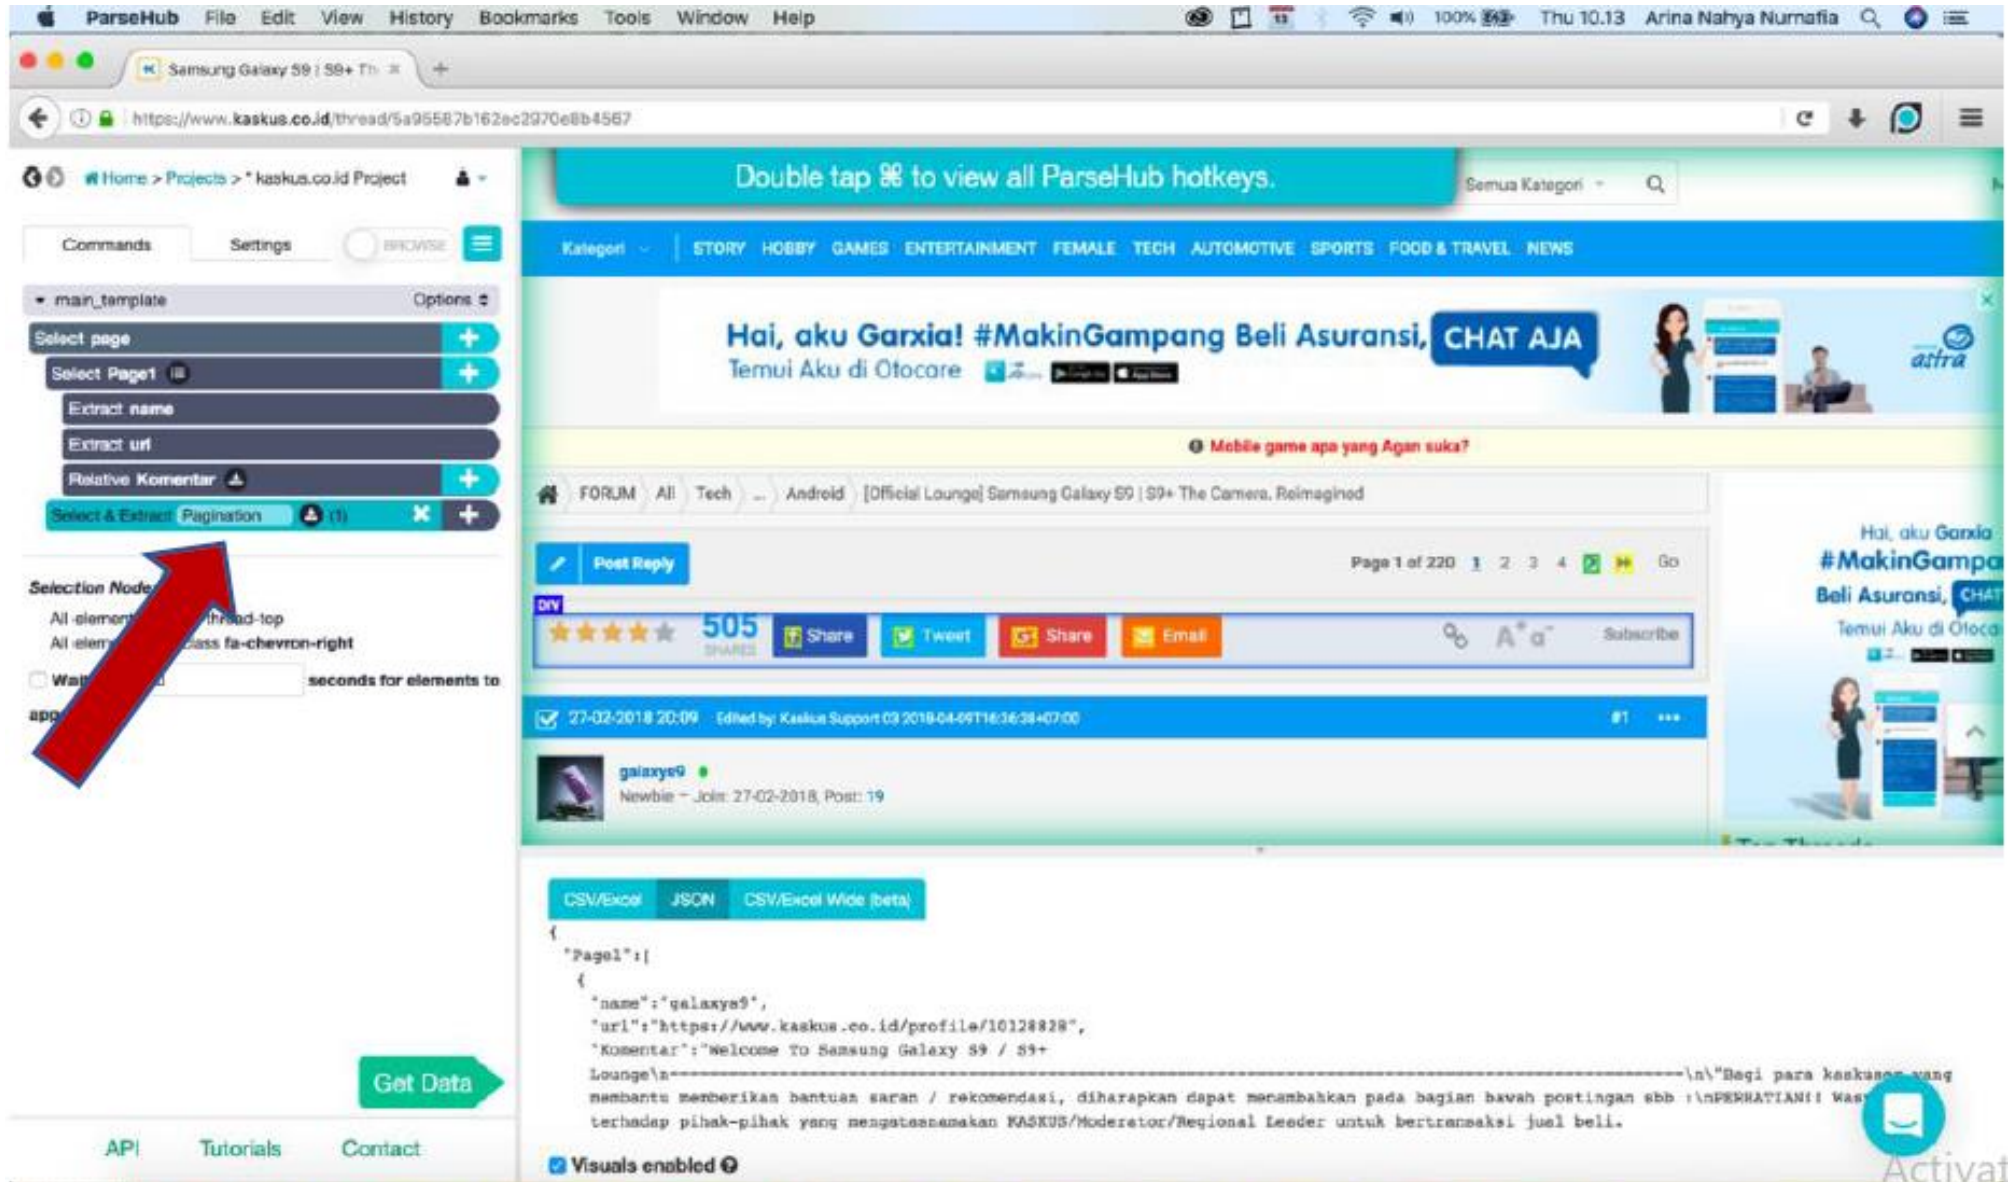

The screenshot displays the ParseHub web interface. On the left, the 'Commands' panel shows a sequence of extraction steps: 'Select page', 'Select Page1', 'Extract name', 'Extract url', and 'Relative: Komentar'. A red arrow points to the 'Selection Node' dropdown menu, which is currently set to 'All elements'. Below this, there is a 'Wait up to' field set to '60' seconds. A large green 'Get Data' button is visible at the bottom of the left panel. The main browser window shows a Kaskus forum thread titled 'JANGAN POST DULU SAMPAI POST KE 10 YA GAN'. The thread is from user 'galaxys9' and contains a welcome message. The bottom of the browser window shows a 'KASKUS Ads' section with various advertisements. The ParseHub interface also includes a top navigation bar with 'API', 'Tutorials', and 'Contact' links, and a bottom status bar with 'Visuals enabled'.

To crawl until the last page, we use pagination.
Click the plus button, and choose select

The screenshot shows the ParseHub web crawler interface. The browser window displays a forum thread on kaskus.co.id. The ParseHub sidebar on the left contains a 'Commands' panel with a 'main_template' section. A red arrow points to a plus button next to the 'Select page (1)' command. A tooltip explains: 'Targets one or more elements for a command (auto-extracts data if possible)'. Below this, a 'Select' menu is open, showing options: 'Select', 'Relative Select', and 'Click'. The 'Select' option is highlighted. The main content area shows the forum thread details, including a post by 'galaxy9' and a pagination bar at the bottom indicating 'Page 1 of 220'. The bottom of the interface shows a 'Get Data' button and a JSON output preview.

```
{
  "Page1": [
    {
      "name": "galaxy9",
      "url": "https://www.kaskus.co.id/profile/10128828",
      "Komentar": "Welcome To Samsung Galaxy S9 / S9+ Lounge\\n=====\\n\\n\"Negi pera kaskuser yang membantu memberikan bantuan saran / rekomendasi, diharapkan dapat menambahkan pada bagian bawah postingan sbb :\\nPEREATIAN!! Was terhadap pihak-pihak yang mengatasnamakan KASRUS/Moderator/Regional Leader untuk bertransaksi jual beli."
    }
  ]
}
```

Change the name to “pagination”

The screenshot displays the ParseHub web browser interface. The main window shows a forum page from kaskus.co.id. The sidebar on the left contains a list of extraction rules under the 'main_template' section. A red arrow points to the 'Select & Extract: Pagination' rule, which is highlighted in blue. Below the sidebar, there is a 'Get Data' button and a footer with links for API, Tutorials, and Contact.

ParseHub Interface Elements:

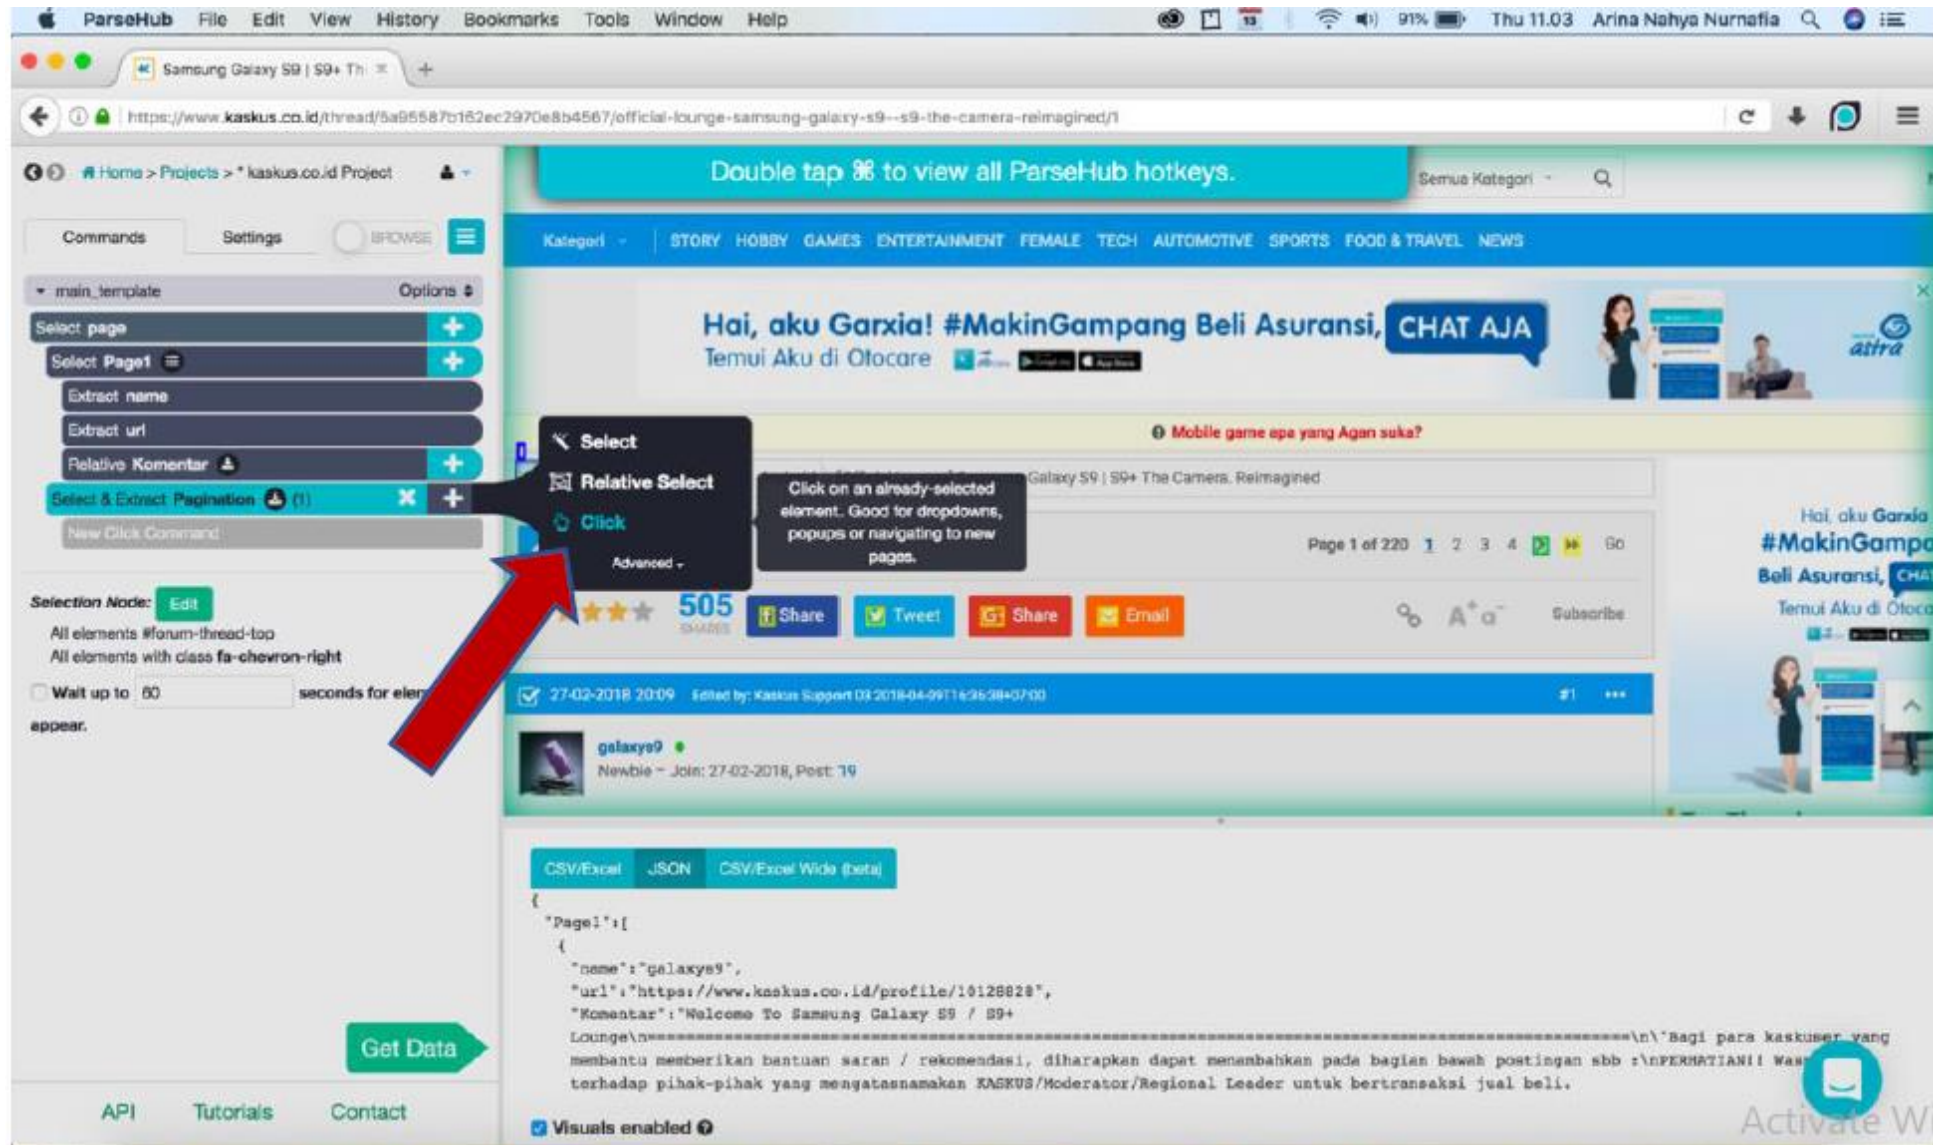

- Commands:** Select page, Select Page1, Extract name, Extract url, Relative Komentar, Select & Extract: Pagination (1).
- Selection Nodes:** All elements with thread-top, All elements with class fa-chevron-right, Wait seconds for elements to appear.
- Get Data** button.
- Footer:** API, Tutorials, Contact.

Web Browser View (kaskus.co.id):

- Header:** Double tap ☰ to view all ParseHub hotkeys. Semua Kategori.
- Categories:** STORY, HOBBY, GAMES, ENTERTAINMENT, FEMALE, TECH, AUTOMOTIVE, SPORTS, FOOD & TRAVEL, NEWS.
- Advertisement:** Hai, aku Garxia! #MakinGampang Beli Asuransi, CHAT AJA. Temui Aku di Otocare.
- Forum Post:** [Official Lounge] Samsung Galaxy S9 | S9+ The Camera, Reimagined. Page 1 of 220. 505 SHARES.
- User Profile:** galaxy9, Newbie - Join: 27-02-2018, Post: 19.
- Export Options:** CSV/Excel, JSON, CSV/Excel Wide (beta).
- JSON Output:**

```
{
  "Page1": [
    {
      "name": "galaxy9",
      "url": "https://www.kaskus.co.id/profile/10128828",
      "komentar": "Welcome To Samsung Galaxy S9 / S9+ Lounge"
    }
  ]
}
```
- Visuals enabled** checkbox.

Click the plus button and choose

Click the “Yes” button

The screenshot shows a web browser window with the ParseHub application running. The background is a Kaskus forum thread titled "Samsung Galaxy S9 | S9+ Th...". The ParseHub interface is overlaid on the left and center of the screen.

ParseHub Interface (Left):

- Commands: main_template
- Options: Select page, Select Page1, Extract name, Extract url, Relative Komentar, Select Pagination
- Buttons: Click and go to main_template
- Settings: Loads a new page (selected), Uses AJAX, Go to Existing Template: main_template
- Wait up to: 5 seconds for page to load

    }
  ]
}
```

Visuals enabled

Click “Repeat Current Template” button to make sure that we use the same template for each page.

The screenshot shows the ParseHub web interface. On the left is a sidebar with 'Commands' and 'Settings' tabs. Under 'main_template', there are options to 'Select page', 'Select Page1', 'Extract name', 'Extract url', 'Relative Komentar', and 'Select Pagination'. Below these are checkboxes for 'Loads a new page' (selected) and 'Uses AJAX', and a 'Go to Existing Template' dropdown set to 'main_template'. There are also input fields for 'Wait up to 5 seconds for page to load' and 'Max depth 0'. A green 'Get Data' button is at the bottom of the sidebar. The main area displays a 'Click setup' dialog box with the question 'Is > a next page button?'. It has 'Yes' and 'No' buttons. Below the question, it says 'This click takes you to the next page of results. It will repeat the current template (pagination help)'. There is a 'Repeat the Current Template' button and an 'Advanced' dropdown. A large red arrow points to the 'Repeat Current Template' button. At the bottom of the main area, there are tabs for 'CSV/Excel', 'JSON', and 'CSV/Excel Wide (beta)'. Below these is a JSON output snippet showing a list of items with fields like 'name', 'url', and 'komentar'. At the very bottom, there is a 'Visuals enabled' checkbox.
